Summary

Software Engineer with 4+ years of experience building frontend applications, design systems and developer tooling at enterprise scale. Specialized in Node.js, GitHub Actions CI/CD pipelines, agentic AI tools and React used across hundreds of repositories. Passionate about replacing manual processes with scripts, pipelines and agentic workflows that improve quality, velocity and developer experience.

Professional Experience

The Home Depot — Software Engineer II

Miami, FL / Oct 2022 – Present

- Implemented GitHub Actions pipelines to measure React component health across 400+ repositories.
- Built an AI-powered NLP tool using Gemini that lets developers query internal docs, metrics and ownership data in natural language.
- Deployed an MCP RAG server indexing documentation and engineering knowledge to power contextual AI and Copilot workflows.
- Maintained and enhanced a WebdriverIO E2E testing framework for critical mobile and desktop user flows.

The Home Depot — Software Engineer I

Miami, FL / Aug 2021 – Oct 2022

- Built an internal UI component intelligence platform (API & React UI) with a centralized database of metadata for all web components.
- Developed a Node.js CLI authentication framework implementing OIDC/OAuth flows for secure login and token management.
- Contributed to the Stencil Design System, creating accessible, mobile-first React components (Buttons, Cards, Toggles, etc.).
- Collaborated with UX and platform teams to enforce WCAG accessibility and consistent design primitives across the organization.
